

Framing and matting a 24 x 36 print

A 24 x36 print can be framed with a ready-made frame. However, since 24x36 is the largest ready made size commonly available, it is impossible to matt. Simply choose a frame and place the print directly into the frame, and hang it on the wall to enjoy.

If you insist on a matt for this size of print, the frame will have to be custom made, and will most likely be very pricey. Look for 1/2 off custom framing coupons in the newspaper or on line.
